

# Add-on SOFTWARE for FUTURA CE150/250/350

## **Auto Cross-Stitch NEW**

Auto Cross-Stitch Embroidery Software for the Singer CE-150, CE-250 and CE-350 allows you to convert images into cross-stitch designs. The easy to follow wizard guides you through the whole process. In the "Edit Images" you can create, scan and edit images. The Software allows you to set your cross-stitch sizes and choose different colours.

## **HyperFont NEW**

Hyperfont® enhances your Futura's™ built-in software with the capability of automatic conversion of TrueType® fonts into embroidery fonts! Using the Singer® HyperFont® Software and your Futura™ sewing machine you can take any TrueType® font from your computer and incorporate it into your design.

**Easy to use:** just type, size, position and stitch in the selected font.

## **PhotoStitch NEW**

Convert photos to embroidery designs. Easy-to-follow wizards guide you through the whole process. For use with the Singer Futura CE-150, CE-250 and CE-350. Edit images /Adjust brightness and contrast /Choose colour or monochrome /PhotoStitch software digitizes photo images into embroidery with a special technique that recreates the appearance of the photo in stitches. It's amazing how fast scanned-in photos can turn into unique embroidery images. The Singer Futura PhotoStitch Software converts high-contrast photos or digital templates into personalized embroidery motifs, in no time! And thanks to flexible settings of stitch length and density, you always get outstanding, precise stitch results!
